Introducing BETAPLUS

Leading the way in MS therapy support

Leading the way
in MS therapy support
BETA PLUS

A better quality of life ...

Over the past decade since making available the first effective therapy for multiple sclerosis (MS), Schering has continuously improved and expanded the wide range of support services offered.

From extensive information materials for people living with MS to a range of useful therapy aids and specialised personal assistance – BETAPLUS has evolved to be the first customised MS patient programme.

Designed exclusively for people living with MS, BETAPLUS sets new standards in therapy support by offering specially developed service modules, designed to reach beyond outstanding efficacy – and providing the right solutions that make a difference.

By constantly striving to improve and expand the modules and services available within BETAPLUS, Schering remains committed to always keeping ahead and leading the way in MS therapy support.

Info Materials

- Brochures
- CD-ROMs
- Videos

These materials are designed to meet the need for clear, complete and easy to understand information in a convenient format, especially at the beginning of therapy.

MS-Gateway

- Global and local websites (in local languages)

www.ms-gateway.com and the locally adapted country sites provide a comprehensive source of information and news on the latest developments as well as a forum for exchanging knowledge and experiences within the worldwide community of people living with MS.

Hotline

- Trained MS experts

MS experts are there to answer any query patients and their relatives may have, providing quick and convenient support and reliable information from the best possible source.

Interactive Programme

- Action, Communication and Treatment in MS (ACT)

With this interactive programme, patients gain a better understanding of their illness and its implications, enabling them, together with their doctor, to better adapt therapy to their particular situation.

Therapy Aids

- Training and Starter Set
- Application Set
- Therapy Pass
- Betaferon® Station

This unique range of useful materials and devices greatly simplifies procedures and enhances patient comfort.

Autoinjectors

- Betaject®
- Betaject® Light

Specially designed medical devices for easy, safe and convenient self-administration. Proven reduction of injection site reactions, extra comfort (choice of two devices) and the benefit of latest technology are just three benefits.

Nurse Support

- Dedicated nurses
- Worldwide network

Providing help and care with face-to-face contact, the dedicated MS nurse supports by training proper handling and administration of the drug and by helping to better cope with the illness.
